

## innogy eTraining AC on-site

innogy eTraining AC on-site is designed for installers. The personal on-site session covers how our AC charging infrastructure is planned and built- Adding to that, we show how to commission and maintain our products.

The on-site training is intended for installers with installation authorization for electrical systems. A requirement is in-depth knowledge of installing electrical service equipment in buildings. Knowledge regarding electromobility or charging infrastructure is not required.

### Training content

 **eMobility:** General information & technical special features

 **Overview:** innogy portfolio

 **Focus part:** Planning, installation, commissioning and maintenance.

We offer the 6-hour eTraining in German or English. The innogy trainings are limited to 10 installers each to keep focus on the content. After the training you will receive a certificate and information about future trainings.
